## DOMESTIC ANIMAL MANAGEMENT PLANS

If your team is starting to plan for the **review or rewriting** of your **Domestic Animal Management Plan**, then this information may be of interest to you.

LMH Consulting/Paws4Play has assisted LGAs prepare DAM Plans for the past 10 years, either by undertaking specific tasks of the rewrite or review, or by managing all components of the project, including:

- community forums and discussion groups
- internal stakeholder workshop & liaison
- survey design and analysis
- policy and document writing

Our 25 years in community, open space and recreation policy and planning, and planning for pets means we understand the complexities associated with planning for, and management of pets in communities.

We also understand changing community expectations relating to pets, and the demand this places on council resources.

We work with metropolitan, rural, and regional LGAs Australia wide. We also work with networks of LGAs who have, or wish to, develop a regional approach to animal management services.

## OUR TEAM

### LESLEY HUMPHREYS

Recreation, open space, community, and animal management service planning and policy writing; dog park design and management plans; off-leash area policy and local law review.

M: 0418 982 070

E: [lesley@lmhconsulting.com.au](mailto:lesley@lmhconsulting.com.au)

- ▶ Moama (NSW)

## TESTIMONIALS

"Paws4Play provided great consultation and strategic planning advice, which resulted in our Domestic Animal Management Plan being clear, concise and achievable."

*Former Manager Regulatory Services, Nillumbik Council, Vic*

"Paws4Play's work with other councils enabled us to fully understand emerging issues and identify strategies to address these. This team was easy to work with, understands the complexities of local government, and responds easily to changing project needs."

*Former Team Leader Local Laws, Maroondah Council, Vic*

"P4P reviewed our initial dog park concept plan, and then worked with us to optimise opportunities and address challenges associated with the site. We learned a great deal from the relationship. Thank you"

*Landscape Architect, Lake Macquarie Council, NSW*

"As a result of working with P4P, our team derived a comprehensive understanding of the planning, design and management requirements associated with fenced off-leash areas (dog parks). We were not aware of the complexity of issues that needed to be addressed and the importance of landscape design in helping to manage dog behaviour in confined places."

*Manager Parks & Open Spaces, Murray River Council, NSW*
